Allowable Subject Matter

1. Claims 1-10 are allowable over prior art.
2. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on the Amendment filed on April 19, 2005.

As in claims 1 and 9, the prior art of record fails to teach or fairly suggest a Viterbi detection unit having the following means and steps:

- (a) a plurality of detectors each providing a first partial response signal with a first constraint length;
- (b) an expected value transmission unit transmitting a plurality of expected values to the plurality of detectors respectively;
- (c) a connection unit connecting the plurality of detectors together to cause the Viterbi detection unit to provide a second partial response signal with a second constraint length different from the first constraint length; and
- (d) a connection control unit controlling connection and disconnection of the plurality of detectors by the connection unit in response to a constraint length of the recorded data.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any response to this action should be mailed to:
